AMPIIRE BRIDGET NOWELLAH

abridgetnowellah506@gmail.com | +256 776 531 930 | Kampala, Uganda

PROFESSIONAL SUMMARY

Results-driven technologist with hands-on experience building digital platforms and leading cross-functional teams. Passionate about leveraging technology to solve real-world problems in agriculture and emerging markets. Proven ability to bridge business and engineering — translating stakeholder needs into clear product requirements, managing agile sprints, and driving feature delivery. Eager to apply product thinking and digital expertise to accelerate EzyAgric's platform adoption across Uganda.

CORE PRODUCT & LEADERSHIP COMPETENCIES

- Product Backlog Management
- User Story Writing & Acceptance Criteria
- Sprint Planning & Prioritization
- Stakeholder Liaison & Communication
- UAT Coordination
- Agile / Scrum Methodologies
- Digital Adoption Strategy
- Cross-functional Team Leadership
- Data-driven Decision Making

PROFESSIONAL EXPERIENCE

Team Lead | *Accountancy Practitioners Forum (APF) Uganda* Feb 2025 – Present

- Owned the product backlog for a full-stack web platform — wrote user stories, defined acceptance criteria, and prioritized features in collaboration with business stakeholders to align delivery with organizational goals.
- Served as the primary liaison between engineering teams and non-technical stakeholders, translating business needs into clear technical requirements and ensuring timely, high-quality feature releases.
- Led agile sprint planning and task coordination via Trello, maintaining velocity and holding the team accountable to delivery commitments.
- Designed and implemented a CMS and portal system with an integrated analytics dashboard, providing data-driven insights to leadership.
- Conducted user acceptance testing (UAT) cycles, gathering feedback from end-users and iterating on features to ensure real-world usability and adoption.
- Optimized database queries and backend architecture for improved platform performance and scalability.

RELEVANT PROJECTS

Digital Payments Product — Rider App | In Production

- Defined product requirements and coordinated delivery of a mobile application featuring Flutterwave payment gateway integration, ensuring seamless end-user transaction experience.
- Collaborated with developers to scope features, define acceptance criteria, and validate the final product against business and user needs.

E-Commerce Platform | In Progress

- Leading product development of a full-stack web application (Django + React.js) including user authentication, product management system, and PostgreSQL database — managing backlog and sprint cycles end-to-end.

Climate Data Analysis & Forecasting | Completed

- Applied data analysis and machine learning to generate climate trend insights, with Power BI visualizations — directly relevant to agricultural decision-making and digital agri-advisory use cases.

Qualitative Interview Data Analysis | Completed

- Conducted NVivo-based analysis of unstructured stakeholder interview data, delivering actionable insights through structured reports — demonstrating skills in translating field research into product and strategy decisions.

EDUCATION & TRAINING

Software Engineering | *Refactory Academy* Expected 2026

Advancing expertise in systems design, software development practices, and agile product delivery.

Data Analysis & Web Development | *Women in Technology Uganda* Graduated 2024

Completed training in data analysis, web development, and digital tools for emerging markets.

TECHNICAL BACKGROUND

Technical skills support product intuition and stakeholder collaboration:

- Python,
- JavaScript,
- Django,
- Node.js,
- React.js,
- PostgreSQL,
- MongoDB,
- REST API Design,
- Docker,
- AWS,
- Git,
- Power BI,
- NVivo.

Project & Collaboration Tools:

- Trello,
- GitLab,
- Agile/Scrum,
- Test-Driven Development (TDD).
